

AMOL LENDE

Full Stack Developer | React.js | PHP | Java | IoT & Cybersecurity

Akole, Maharashtra, India | +91 8862008956 | amollende02@gmail.com

LinkedIn: linkedin.com/in/amol-lende-247b57288 | GitHub: github.com/Amollende12

PROFESSIONAL SUMMARY

Full Stack Developer and final-year Computer Engineering student with hands-on experience building responsive web applications using React.js, JavaScript, PHP, and MySQL. Proficient in Java and Python, with a solid grounding in Git/GitHub workflows and IoT system integration. Strong problem-solving and debugging track record, backed by a corporate internship, a published research paper, and multiple full-stack projects. Collaborative team player focused on continuous learning and delivering reliable, well-tested software.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, SQL, JavaScript

Frontend: HTML5, CSS3, React.js, Bootstrap

Backend: PHP, Java

Databases: MySQL

Developer Tools: Git, GitHub, VS Code, Power BI, Arduino IDE

Domains: Full Stack Development, IoT & Embedded Systems, Cybersecurity

PROJECTS

Balvrit IT Solutions — Full Stack Corporate Website

HTML, CSS, JavaScript, PHP, MySQL, Git, GitHub

- Built a 5-page responsive corporate website with dynamic content rendering, connecting a MySQL database to a PHP-driven frontend for efficient content management.
- Managed the complete development lifecycle using Git and GitHub, delivering a fully functional, production-ready frontend-backend solution.

Automatic Nut-Bolt Detection System

IoT, React.js, Embedded Systems

- Engineered a multi-sensor robotic system paired with a microcontroller to automate nut-bolt inspection, eliminating manual checks for 100% of tested units within a 2-second detection window.
- Designed an interactive React.js dashboard displaying live sensor data for real-time monitoring of overall system performance.

Solar Monitoring System

IoT, Embedded Systems

- Developed an IoT-based system to acquire and visualize 3 key electrical parameters, including voltage, current, and power output, from solar panels.
- Configured microcontroller-sensor integration for continuous data refresh, enabling faster performance analysis than manual readings.

INTERNSHIP EXPERIENCE

ESD Program Trainee — Zensar Technologies (RPG Group)

Jan 2026 – Feb 2026

- Completed a 4-week structured training program, applying Java and Python across 5+ hands-on exercises in data analysis and automation.
- Queried and maintained records across multiple relational database modules using SQL to support reporting for the training team.
- Strengthened problem-solving and professional communication skills through 2 months of hands-on corporate training and assessments.

EDUCATION

B.Tech in Computer Engineering — Sanjivani College of Engineering, Kopergaon

2023 – 2027

CGPA: 7.37

HSC (12th), Science — Agasti Arts, Commerce and Dadasaheb Rupwate Science College, Akole

2022 – 2023

SSC (10th) — Agasti Vidyalay, Akole

2020 – 2021

RESEARCH & CERTIFICATIONS

- Published "IoT-Based Flood Level Monitoring System with Real-Time Alert and Dashboard Visualization," Journal of Sensor and Cloud Computing, MAT Journals.
- Certifications: Cyber Threat Management (Cisco) · SQL Basic (HackerRank) · Data Visualization with Python (Udemy)
